

CITY OF COLUSA DRAINAGE MASTER PLAN

SUMMARY OF STORM DRAINAGE MASTER PLAN REPORTS

Wood Rodgers, Inc. was retained by Ponticello Enterprises to prepare reports relating to a storm drainage master plan for the City of Colusa. Wood Rodgers developed each document in a stand-alone format for easy review and for the City to use as each report was completed. The following reports were prepared by Wood Rodgers:

1. Technical Memorandum – Levee Overview – April 3, 2008, Revised June 23, 2009
2. Storm Drainage Design Criteria – April 2008
3. Problem Identification Report – December 2008, Revised April 2009
4. Drainage Master Plan – June 2009

The reports were completed in the order noted above to: (1) assess the levees affecting the City, (2) establish the rainfall and analytical methodologies applicable to the City; (3) assess the existing flooding problems within the City using the information from the storm drainage design criteria; and (4) determine the impacts of proposed development and offer alternative solutions to both existing and future flooding impacts.
